- EXAMINATION - assesses for overall wellbeing and detects any infections

**₦ 61,900**

## UNLOCK THE FULL SPECTRUM OF HEALTH INSIGHTS

We are responsible for our own health and wellbeing. Regular exercise, a balanced diet, a healthy lifestyle, and wellness checks at periodic intervals\*\* are all important for good health.

Safety at work and on the roads is everyone's responsibility. If driving is the main or a key element of your job, it's important that you undergo regular drivers' medical assessment to ensure that you remain fit to drive.

Being fit to drive is a legal requirement for professional drivers, so it's essential that you inform your employer and undergo a reassessment if your health status has changed (if you now have to wear glasses, have had a heart attack or been diagnosed with diabetes, for example).

Last but not least, with the rising global cancer burden, our screening provides for early detection of cancers that may arise from the large intestines
