Cerba Outwork Test Catalogue

About Pathologists Lancet Kenya

Pathologists Lancet Kenya Limited is part of Cerba Lancet Africa - the leading network of laboratory medicine and pathology facilities in Africa.

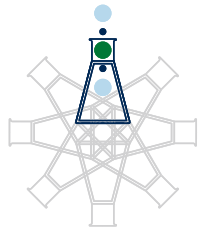

With a presence of more than 40 laboratories and sample collection depots across Kenya, and a presence in more than 15 counties in Kenya, a clear testament of our efforts in increasing access to quality diagnostic services, Pathologists Lancet Kenya provides vital diagnostic, monitoring and screening tests from routine to specialized and esoteric tests through standalone laboratory facilities.

We have distinguished ourselves by offering specialized pathology services including Anatomic Pathology (Histopathology/Cytopathology/Immunohistochemistry), PCR and Genetic tests for Oncology and Infectious Diseases, Tuberculosis testing, Microbiology, Endocrinology, Clinical Chemistry, Coagulation Assays, Haematology, Toxicology and Occupational Health tests.

Our services are offered to doctors and their patients through, clinics & hospitals, industrial & corporate entities, insurances, and outreach programmes. We also serve clinical trials and research groups, NGOs and engage with government agencies through public-private partnerships.

We offer a wide range of veterinary laboratory testing for companion animals with plans underway to expand the testing portfolio. This makes us the only private laboratory in Kenya and the wider East African region to offer dedicated veterinary laboratory services. In addition, we provide water testing services where we offer quick and reliable enumeration of coliforms in water to determine suitability of consumption.

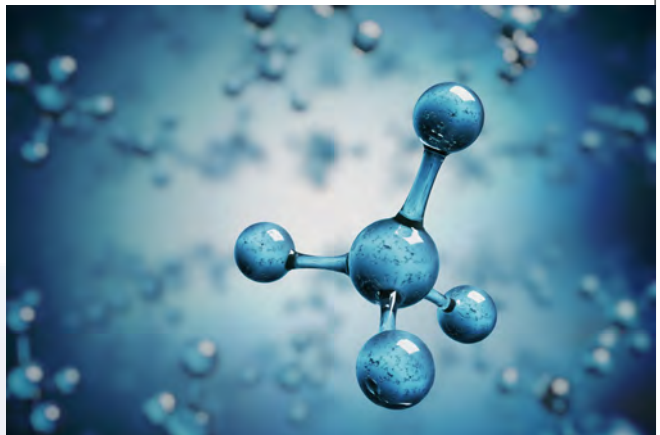

Call us on **0703 061000** or email us on **info@cerbalancetafrica.com** for enquiries on these tests and the specific TAT.

Pathologists Lancet Kenya merged with CerbaHealthcare on a joint venture (JV) to a newly formed Cerba Lancet Africa which is aimed at serving millions of health professionals and patients.

Through the Joint Venture, Cerba Lancet Africa will now manage a network of more than 100 ISO-accredited laboratories across 11 African countries from Kenya among other African countries including Tanzania, Uganda, Rwanda, Botswana, Ghana, Mozambique, Nigeria, Swaziland, Zambia and Zimbabwe. Cerba HealthCare has its headquarters in Paris, where it operates a network of laboratories and technical facilities across Europe – mainly in France, Belgium, Luxembourg and Italy – that serve more than 50 countries in Europe, Africa and Middle East.

Cerba Lancet Africa will invest substantially to build a local network of clinical pathology laboratories on the African continent and will serve millions of health professionals and patients across Kenya, the East African region and the African continent as a whole, providing internationally-accredited and high quality pathology services to ensure timely, accurate diagnosis of a wide variety of illnesses and their effective management.

This joint venture is also set to improve expertise and accessibility of more specialized tests in medical diagnostics to meet health professionals and patients expectations.
